"Interior design is a form of expression. My goal as an interior designer is to create a space that says something about the personality, lifestyle and needs of my client. The end result will be different for everyone, but the process will be much the same: communication, commitment, satisfaction and fun!"

The focus of interior design has returned to creating a space that is aesthetically appealing and functional. Technology and the environment are also increasingly influential. Pinks, grassy yellow-greens, wattle yellows and tangerines are extremely popular here, as they are in Europe. Elegant, tailored and timeless interiors can be created using unique colour combinations as well as fabrics. For those of you who like something a little different, Bohemian-style fabrics and colours are back again.

Wallpaper and curtains are also more popular than ever, and are an easy way to update a room. Fabrics are more textured than before and can transform a room when used to cover a couch or even cushions. There are so many colours and patterns available to you. Wally and I regularly participate in design expos & seminars so we can continue to bring you innovative, creative design ideas. Come in and view some of my samples and I will help you match patterns and colours to uniquely suit your home and tastes.

It is amazing how much of a difference changing even a single element of a room can make, so why waste money on furnishings you are not confident with? I can help you choose the right fabric, wallpaper or window furnishings for your next interior update – big or small. If you already have something in mind, just give me a call and I will source the materials for you and help you put it together. Jennie Tomlinson
